SUMMARY

I'm a **Full Stack Software Engineer** building practical solutions that make everyday tasks easier. I've worked with the **MERN**, **MEAN stack** and **Django** to create tools like a **smart university transport system** for my campus and a **productivity app for people with short-term memory** challenges, aligning my experience with office-based collaboration and deployment needs. I focus on writing clean, scalable code and building user-friendly experiences that solve real problems.

WORK EXPERIENCE

Junior Software Engineer *AitchTech Bahawalpur*
Magnt – Enterprise AI Chat Application

July 2025 - Present

- Implemented **dynamic chart generation** using Vega Charts to visualize conversation insights.
- Applied **custom styling and formatting** to charts, ensuring clear data presentation and a polished UI.
- Added **theme-ability** across the UI, enabling seamless switching between multiple themes (light/dark/magnt).
- Integrated **LTR/RTL layout support**, delivering a fully multilingual and globally adaptable UI experience.

VaultX – Blockchain Based NFT Platform

- Integrated **Privy Wallet** to enable secure wallet connection and user authentication.
- Implemented **transaction signing** and **on-chain submission** for secure blockchain data storage.
- Connected frontend to **backend REST APIs** to ensure dynamic, real-time data handling.
- Replaced **Zustand state management** with **SWR**, improving data fetching, caching, and revalidation for a more reactive UI.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python

Frontend Technologies: Angular, React

Backend Technologies: Django, Node.js, Express.js, REST APIs

Databases: MongoDB, MySQL

Deployment Platforms: Vercel, Netlify, Render, Digital Ocean

Version Control: Git & GitHub

Data Science Libraries: Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn

Cloud Computing: AWS-Basics (EC2, S3, RDS, DynamoDB, Lambda, CloudFront, CloudFormation, Load Balancer)

PERSONAL PROJECTS

Task AI Studio (MERN) | [GitHub](#)

- Built a **productivity app** to help users with **short-term memory** to track tasks and receive timely reminders.
- Implemented **AI-powered Task Scheduling** that automatically sorts tasks based on priority and deadlines to optimize user productivity.
- Developed a Node.js-based **WhatsApp bot** that sends task **reminders every 3 hours**.
- Enabled **WhatsApp-based task retrieval** using `whatsapp-web.js` library.

Ecommerce Website (MERN) | [GitHub](#)

- Converted a **WordPress** website into a high-performance **MERN stack** application.
- Improved load time from **57s to 12s** (78% speed boost).
- Built an **admin panel** with order, product, and user management.
- Integrated **analytics** to track visitor engagement and product views.

Smart University Transport System (Django) | [GitHub](#)

- Designed a **multi-role** system for **Students, Drivers, and Admins** to manage university bus transport.
- Built a **driver portal** for live location updates and a **student portal** for bus booking, schedule visibility, and arrival/departure tracking.
- Implemented **pathfinding** algorithm for direct and indirect bus routes.
- Enabled admins to view the number of students registered for specific routes for better **bus management**.

EDUCATION

The Islamia University of Bahawalpur

BS in Computer Science, GPA: 3.4

Bahawalpur, Pakistan

Aug 2022 - Present

- Awarded an Appreciation Certificate for serving as an Official Member of the IUB Publication Society as a Designer/Editor.
- Received a Shield in recognition of contribution to BLCF (Bahawalpur Literary Cultural Festival) organization.

Military College Sui

F.Sc (Grades: 95%)

Sui, Pakistan

May 2016 – Jul 2021

- Awarded an Appreciation Certificate for being part of the Drama Club for 1 year.
- Achieved 3rd Position in Inter House Painting Calligraphy Competition.
- Actively participated in sports and physical activities including Volleyball and Running.

CERTIFICATIONS

Responsive Web Design, FreeCodeCamp

Sep 2023

Intro to Git and GitHub, Google/Coursera

Dec 2023

React Basics, Meta/Coursera

Jan 2024

Intro To Python, DataCamp

Jan 2025

Writing Efficient Code in Python, DataCamp

Jan 2025

Exploratory Data Analysis, DataCamp

Jan 2025
